

I can see at although we have a very good student environment at NMBU there is still much to do and work with, and this is something I am interested in working more with. From previous experiences at another university, I got to see how not having the opportunity nor the representation at the various university/faculty boards influenced our everyday life for worse. Therefore I believe that when we get the opportunity to be represented and heard, we need to take that opportunity to maintain what we have and improve our university where we can. I have a multicultural background but have lived over half of my life in Norway. As an International university, with both Norwegian and international students, I feel like a could be a good representative for both as I feel I can understand the position of both groups. I am really social and like working with others towards a common goal, and I believe I would make a good candidate to improve both the social and academic well-being.
