

Dear fellow students!

My name is Sigrid Esmeralda Arnestad, I am 25 years and currently studying environmental sciences. Early in my studies I was lucky to be elected as the leader of the student council at MINA . I have never regretted the challenge, and have learned an incredible amount! After two years in the position as leader, I now have many useful experiences to lean on to make an impact on cases. It is time to step aside as leader, but I dont want to quit working with student democracy quite yet. Working with cases within the student council has shown us the importance of making demands and raise our voice for the needs we have as students.

Our voice needs to be present at all levels within our faculty, also in the faculty board when important decisions are to be made. This is regardless of whether it is related to budget, strategies or the future of MINA. The decisions affect us and the future student, and we have to be a part of them! My motivation for applying for the position as representative in the faculty board is therefor to be the voice of the student. I hope to contribute so that all students at MINA feel a sense of affiliation, both academically and socially, and that sustainability is reflected to an even greater extent in the operation of our faculty. I hope I get your trust to represent you and our fellow students, and wish you a great election!
