

First of all, I wish to apply to this position to learn more about how the university works. I have always loved to take on extra positions at school or in my free time.

At NMBU I have taken on the position as buddy chief for my faculty, and I love it. My work includes to oversee a budget, get the money and organize the week along with other important tasks. In February I took on a position at our association (Energiforeningen) where I am responsible for the social events. Events like a trip outside the country and a cabin trip are big event that needs a thorough plan. Before that in high school I was volunteering in Operasjon Dagsverk in Oslo. Me and a group had the responsibility to arrange OD in Oslo. This was done by holding lectures for the schools and lecturing smaller groups. We held seminars, visited schools and talked to teachers.

I want to expand my knowledge and learn more of the more technical side of school.

I am well trained in organizational work, and I look forward to a new challenge. Also, my biggest motivation is always learning and to learn by doing.
