

Hi! My name is Veronica and I'm currently studying food science at my 4th year. After 4 fantastic years as a student at KBM, I have gained a good insight into teaching and subject areas that exist at KBM, and have a desire to contribute to developing the fields of study and the faculty to become even better. I find board work incredibly interesting and I like to get involved in cases that can find good solutions to make the future better. I love KBM and already think it is a very good place to study, but if I can contribute with a student's perspective to make the future even better for the students, this would be very rewarding. If I am elected as a student representative on the faculty board at KBM, I will use my commitment to strengthen KBM as a faculty at NMBU as best I can. Good election!
