

My name is Maja Raz Karterud, and I am hereby applying as a female representative for the Faculty Board at REALTEK.

I am currently in the first year of an integrated master's degree in building technology and architecture, and have already completed a bachelor's degree in international environmental and development studies (at LANDSAM). I sit as student council leader at the Student Council for REALTEK, where I have gained insight into how the administration works with and relates to the students. I have worked a lot with student issues over the past year, including ensuring that the new Student House meets our standards, that the implementation of the MATH exams was conducted in the fairest way (it probably needs to be worked on a little more), and general inclusion of the student vote up against the faculty administration.

I am a very positive and committed student, who always has a smile on my face. I am structured and careful in everything I do, and do not give up until I am satisfied. Fighting spirit is not a shortcoming with me, and I have always managed to solve the problems I am faced with. I have also for a long time worked in the service industry, where I have learned how to talk to people so that they feel understood and heard. I want to contribute so that all students at REALTEK feel safe and valued, and that both digital, physical, and social resources are set up in the best possible way.

My motivation for applying for this position is to make the students' voices clear. I want to work even more with the communication between students and staff, and for the inclusion of the student's voice in all matters that affect us. This is a position with unique opportunities for influence in what the future of REALTEK will look like, and I want the students to have a big role in it. I hope you will give me the confidence to complete this job!

Thank you for voting!
