

I'm running for the Faculty Board at BIOVIT because I want to be part of shaping it in an exciting direction, emphasizing diversity and quality in the subjects as well as the study-programs. It is important for BIOVIT to uphold a high standard and quality in their programs, as these are very future oriented. At the same time they must have room to expand the way of thinking to meet the challenges in the world both now and in the future. My motivation is also to be able to influence the faculty in a way that makes it both exciting and predictable to be a student at BIOVIT, where information between faculty and students is shared easily, and where the students are able to influence and shape their subject and faculty.
