

Hi!

My name is Gina Marie Granheim, and I wish to be a student represent in the university board at NMBU. I'm studying Master of Sciences in Environmental Sciences (Miljøvitenskap) and I'm going to write my master thesis about water and pollution in the autumn. I love sport and play floorball (and every other sport I can make time for) at Eika.

I have good experience from the student democracy. During the last year I have been in the faculty board for the MINA faculty. I have also been deputy leader in the student council for 2 years and representative in the undervisningsutvalg/studieutvalg. I was part of the foundation of Miljøvitenskap's student organisation (linjeforening) and have been leader

there over 3 periods.

Through my positions I have gained an understanding of both what's important for us students and how the governing bodies work with overarching issues such as strategy and budget.

In the university board I wish to work towards:

- Making the student voice be heard and emphasized
- Interdisciplinarity and relevance to the working life (e.g. through internships)
- Quality in education
- Good communication between the student democracy and US

GOOD VOTING!

Gina Marie Granheim
