

«Motivation is the power that get us to thrive too the next level” I wish to represent the faculty board to every student’s case! I get involved across the studies and want to do my best. I am motivated to be the spokesperson for the students at BIOVIT and the topics that should be improved:) Among personal qualities, I think those who know me will highlight commitment, execution ability and great work capacity as the most prominent. The values I value the most are honesty and commitment!
